PLASTIC RECYCLING SYSTEMS

# Welcome to the next level in opening up new markets!

1

Easy and convenient:  
use top technology  
instead of buying it

2

Including EREMA  
support and know-how

3

Customised recycling  
compounds

## Step up!

The EREMA UpCentre® is your ticket to the future market of upcycling! Take advantage of this unique service to adapt your recycling compound exactly to the specific application of your customer (film, injection-moulded part, etc.). At the EREMA UpCentre® **you receive the sample quantities required for this.** Quickly, conveniently and very flexibly.

Your benefit: you use ultramodern COREMA® recycling and compounding technology including expert support and know-how on-site without having to buy your own system. This means: **risk down, flexibility up!**

## Recycling & compounding – in a single step

EREMA's COREMA® technology unites recycling and compounding in a single process step, saving both time and costs. Inexpensive recycling raw materials (e.g. PP nonwoven, PE edge trim, PA fibres, etc.) serve as input material. A wide variety of additives, fillers and reinforcing agents are admixed to this material – also in higher amounts. The result is customised recycling compounds for high-grade applications.

## Our service – your benefit

- Use ultramodern COREMA® 1108 T without having to buy
- For new recycling compound sampling
- Including on-site expert support and know-how
- Production quantities from 2 to 200 tonnes per month
- Easy, convenient, quick
- As flexible as you want!
- No investment risk
- 24-hour operation possible

## Upcycling made easy!

## More questions?

### We would be pleased to answer them!

Your EREMA advisor will be pleased to attend to your request personally and quickly. If you are interested in a demonstration or a test run with your specific material it would be a pleasure for us to make an appointment and welcome you to our EREMA Customer Centre at the headquarters in Ansfelden, near Linz in Austria.

We look forward to seeing you at EREMA!
